

## Internet Race Review Game

*To prepare this game, make each racer like this: Cut three pipe cleaners in half. Attach them to each other in the middle and bend them to make “legs”. Glue a puff ball to the top. Glue two eyes onto the puff ball.*

*Prepare the net with string, or use tape to make one on the surface of your desk.*

Divide the class into four teams. Assign each team a racer—named Gigabyte, Kilobyte, Terabyte, and Megabyte. Place the four racers at the beginning of the “internet”. Ask a review question. The person who raises his hand and gives the correct answer gets to come and move his team’s racer up one space on the “internet”. Continue asking question and moving the racers until one team crosses the finish line into cyberspace.
